Notting Hill and Ealing High School for Girls London

Notting Hill & Ealing High School is a complex new build and remodelling project within a live school environment. The school is an independent day school for girls aged 4 –18 currently attracting 1450 students. Works consist of the demolition of the existing gymnasium and assembly hall located at the heart of the school and the construction of a new 6-storey extension which includes an underground sports hall and large double height flexible performance / assembly / drama zone. The second floor dance studio is one of the feature architectural elements. Remodelling and refurbishment works are also being carried out to improve the existing main entrance building at ground floor level with the reconfiguration of the existing entrance, reception, library and portrait room to form a clear, welcoming, light and open route leading seamlessly to the feature three storey high foyer space of the new extension.
